The Great Smoky Mountains Carl Heilman II 2018-04-24 Stunning photographs celebrate the Great Smoky Mountains National Park, iconic Blue Ridge Parkway, Biltmore Estate, and Shenandoah Valley and National Park. Extending from Virginia to northern Georgia, the Blue Ridge Mountains include Great Smoky Mountains National Park, the 469-mile-long Blue Ridge Parkway, and Shenandoah National Park, which includes the 105-mile-long Skyline Drive. Within this region are the world renowned Biltmore Estate, Luray Caverns, Natural Bridge, and Grandfather Mountain. The Blue Ridge range contains the highest mountains on the East Coast, with 125 peaks above 5,000 feet in elevation. The scenic roadways, spectacular overlooks, and numerous rocky crags offer magnificent views of layer after layer of mountains rolling off into the distance. Hiking trails lead to wild mountain summits, valley streams, and waterfalls. Each season offers a fresh perspective, from fall colors and winter snow and ice to spring and summer flowers and storms. In addition, numerous homes, barns, schools, churches, and mills have been protected and preserved throughout the Blue Ridge Mountains, offering a picturesque look at Appalachian life in past centuries. To appreciate the wonders of this region through the lens of a well-known master photographer is like exploring it for the first time.

Mitigating Old Tree Mortality in Long-Unburned, Fire-Dependent Forests Sharon M. Hood 2011 This is a print on demand edition of a hard to find publication. This report synthesizes the literature and current state of knowledge pertaining to re-introducing fire in stands where it has been excluded for long periods and the impact of these introductory fires on overstory tree injury and mortality. Only forested ecosystems in the United States that are adapted to survive frequent fire are included. Treatment options that minimize large-diameter and old tree injury and mortality in areas with deep duff and methods to manage and reduce duff accumulations are discussed. Pertinent background information on tree physiology, properties of duff, and historical versus current disturbance regimes are also discussed. Charts and tables.

Gila Gregory McNamee 2012-10-15 For sixty million years, the Gila River, longer than the Hudson and the Delaware combined, has shaped the ecology of the Southwest from its source in New Mexico to its confluence with the Colorado River in Arizona. Today, for at least half its length, the Gila is dead, like so many of the West’s great rivers, owing to overgrazing, damming, and other practices. This richly documented cautionary tale narrates the Gila’s natural and human history. Now updated, McNamee’s study traces recent efforts to resuscitate portions of this important riparian corridor.

Blue Plateau Mark Tredinnick 2015-11-23 'I came to the plateau in the winter of ninety-eight. A place a thousand metres in the air ... a world of sandstone and eucalypt and unregenerate weather, a place just fallen from the sky ...' The Blue Plateau is a lyrical natural history of the Blue Mountains, and a memoir of one man's attempt to belong there. An inspired meditation on the contours of the land and its people, of time and place and family, the rhythms of nature and the rhythms of friendship, it is a book of many belongings. Here you will meet the plateau's first people; you will meet Les and Henryk and Jim; you will walk the Kedumba and the Kanimbla in drought and fire and flood. Evocative and deeply moving, The Blue Plateau is a poet's story of an astonishing place and a loving portrait of home.

Oregon's Wilderness Areas 2003-02 From the towering volcanic peaks of the Three Sisters Wilderness to the Wild and Scenic Snake River winding through Hells Canyon, from the Timberline Trail around Mount Hood to the gorges of Steens Mountain, this detailed guide takes you to outdoor adventures in both the famous and lesser-known of Oregon's Wilderness Areas. Learn about the natural, human, and geological history of these protected lands; climate; flora and fauna; and ongoing preservation efforts. Whether day-hiking or backpacking, cross-country skiing or boating, this book will help you to explore the variety of activities and natural treasures within Oregon's 40 designated Wilderness Areas. Also included are full descriptions of Oregon Cascades Recreation Area and Crater Lake National Park, not official Wilderness Areas but still major Cascade wildlands. In Oregon's Wilderness Areas: The Complete Guide, ecologist, writer, and photographer George Wuerthner brings the state's diverse wildlands together into one comprehensive, pack-along guidebook. Book jacket.

To the Far Blue Mountains Louis L'Amour 2003-09-30 In To the Far Blue Mountains, Louis L’Amour weaves the unforgettable tale of a man who, after returning to his homeland, discovers that finding his way back to America may be impossible. Barnabas Sackett was leaving England to make his fortune in the New World. But as he settled his affairs, he learned that a royal warrant had been sworn out against him and that men were searching for him in every port. At issue were some rare gold coins Sackett had sold to finance his first trip to the Americas—coins believed to be part of a great treasure lost by King John years before. Believing that Sackett possesses the rest of the treasure, Queen Bess will stop at nothing to find him. If he’s caught, not only will his dream of a life in America be lost, but he will be brutally tortured and put to death on the gallows.

Ecological Pioneers Martin Mulligan 2001-10-22 Whenever the history of ecological thought has been written the contributions of Australian thinkers have been omitted. Yet Australia as a continent of extreme, rare and complex environments has produced a startling group of ecological pioneers. Across a wide range of human endeavour, Australian thinkers and innovators - whether they have thought of themselves as environmentalists or not - have made some truly original contributions to ecological thought. Ecological Pioneers traces the emergence of ecological understandings in Australia. By constructing a social history with chapters focusing on different fields in the arts, sciences, politics and public life, the authors bring to life the work of significant individuals. Some of the ecological pioneers featured include Joseph Banks, Russell Drysdale, Judith Wright, Myles Dunphy, Philip Crosbie Morrison, Vincent Serventy, Francis Ratcliffe, the Gurindji and Yolngu peoples, Bill Mollison, Jack Mundey, Val Plumwood, Michael Leunig, and many more.

This expansive region includes the Spokane area, Colville National Forest and northeastern Washington (Colville, Metaline Falls, Kettle Falls, Republic, Tonasket), Moses Lake, Soap Lake, Coulee Dam, Lake Roosevelt, and other parts of the mid- and upper-Columbia River basin, southeast Washington (Pullman, the Blue Mountains, Walla Walla, Tri-Cities), and the eastern reaches of the Columbia River. Who better to cover such a large geographic area than long-time eastern Washington expert Rich Landers, partnered with Day Hiking guru Craig Romano? These two trekkers have combined forces to research and write an authoritative guide that is sure to become the new gold standard. **Mountaineers Books designates 1 percent of the sales of select guidebooks in our Day Hiking series toward volunteer trail maintenance. For this book, our 1 percent of sales is going to Washington Trails Association (WTA). WTA hosts more than 750 work parties throughout Washington's Cascades and Olympics each year, with volunteers clearing downed logs after spring snowmelt, cutting away brush, retreading worn stretches of trail, and building bridges and turnpikes. Their efforts are essential to the land managers who maintain thousands of acres on shoestring budgets.

On the Trail Silas Chamberlin 2016-01-01 The first history of the American hiking community and its contributions to the nation's vast network of trails In the mid-nineteenth century urban walking clubs emerged in the United States. A little more than a century later, tens of millions of Americans were hiking on trails blazed in every region of the country. This groundbreaking book is the first full account of the unique history of the American hiking community and its rich, nationwide culture. Delving into unexplored archives, including those of the Appalachian Mountain Club, Sierra Club, Green Mountain Club, and many others, Silas Chamberlin recounts the activities of hikers who over many decades formed clubs, built trails, and advocated for environmental protection. He also discusses the shifting attitudes of the late 1960s and early 1970s when ideas about traditional volunteerism shifted and new hikers came to see trail blazing and maintenance as government responsibilities. Chamberlin explores the implications for hiking groups, future

club leaders, and the millions of others who find happiness, inspiration, and better health on America's trails.

In this new book Dale and his co-adventurer, Ryan Barry, focus on adventures within easy day-tripping distance of the city centre -- and sometimes right in the city itself. From hikes across the Barrens to Polly's Cove with views of Peggy's Cove few have seen, to mountain biking a beautiful series of trails at Spider Lake, Haligonians and visitors alike will be amazed at how much there is to discover near at hand. Included is a new spot to cross-country ski with a chance to ice fish at the end of the trail at Jerry Lawrence Park, and a kayak route through wilderness areas to see stunning vistas of the Atlantic coast at Shut-In Island. Dale Dunlop and Ryan Barry offer the inside scoop along with detailed information about how to find each location, stunning full-colour photography and tips about what to bring with you. Also included are GPS co-ordinates, cell phone coverage details and easy to understand graphics indicating level of difficulty and type of adventure.

[The Geography of Tourism and Recreation](#) C. Michael Hall 2014-05-09 This fourth edition of The Geography of Tourism and Recreation provides students with a comprehensive introduction to the interrelationship between tourism, leisure and recreation from geographical and social science perspectives. It still remains the only book to systematically compare and contrast in a spatial context, tourism and recreation in relation to leisure time, offering insight into the demand, supply, planning, destination management and impacts of tourism and recreation. Whilst retaining its accessible style and approach this edition has been significantly updated to reflect recent developments and new concepts from geography which are beginning to permeate the tourism and recreational field. New features include: Content on the most recent developments, climate change, sustainability, mobilities and crisis management in time and space as well as trends such as low cost airlines and the control of land transport by transnational operators in the EU such as Arriva. More attention to management issues such as innovation and the spatial consequences for tourism and leisure development. New case studies and examples to showcase real life issues, from both developed and developing countries, especially the US, China and South Africa. Completely revised and redeveloped to accommodate new, user- friendly features: case studies, insights, summary points and learning objectives. Written by leading academics, this is essential reading for all tourism, geography, leisure and recreation students.
