Neural Networks for Identification, Prediction, and Control D. T. Pham 1995 This publication describes examples of applications of neural networks in modelling, prediction and control. Topics covered include identification of general linear and nonlinear processes, forecasting of river levels, stock market prices, currency exchange rates, and control of a time-delayed plant and a two-joint robot. The neural network types considered are the multilayer perceptron (MLP), the Elman and Jordan networks, the Group-Method-of-Data-Handling (GMDH), the cerebellar-model-articulation-controller (CMAC) networks and neuromorphic fuzzy logic systems. The algorithms presented are the standard backpropagation (BP) algorithm, the Widrow-Hoff learning, dynamic BP and evolutionary learning. Full listings of computer programs written in C for neural-network-based system identification and prediction to facilitate practical experimentation with neural network techniques are included.

**The Human in Command** Carol McCann 2012-12-06 MAJOR-GENERAL M. K. JEFFERY Command, and mdeed the human in command, has always been key to milItary operations. The complexIt y and tempo of modern operations make this statement even more true today than in the past. However, both the military and the research 2 communities have tended to treat command and control (C ) from a limited per spective. For too long, command and control have been considered as if they were a single concept, with control often dominatmg our study. Indeed, in many 2 cases we have divorced operational C from the military institution itself, resulting in disconnects and inefficiencies. Then, in an attempt to overcome these self-inflicted deficiencies, we have pursued the Holy Grail of technology, hoping that it 2 would solve our C problems. Only now, as we start to realize technology's costs 2 and limitations, are we looking critically at C

- This book attempts to take such a look. The contributions that make up this book are the product of a June 1998 NATO (North Atlantic Treaty Organization) workshop called The Human m Command. Far from being purely an academIc exercise, this gathenng brought together mill 2 tary leaders and civilian scientists to discuss C's central pragmatic and conceptual issues-its assumptions, its practices, and its organization. Indeed, in recent years there has been mounting evidence that both our society and Its military institutions are facing organizational crises.

Ghost Fleet P. W. Singer 2015-08-03 What will the next global conflict look like? Find out in this ripping, near-futuristic thriller. The United States, China, and Russia eye each other across a twenty-first century version of the Cold War, which suddenly heats up at sea, on land, in the air, in outer space, and in cyberspace. The fighting involves everything from stealthy robotic-drone strikes to old warships from the navy’s “ghost fleet.” Fighter pilots unleash a Pearl Harbor-style attack; American veterans become low-tech insurgents; teenage hackers battle in digital playgrounds; Silicon Valley billionaires mobilize for cyber-war; and a serial killer carries out her own vendetta. Ultimately, victory will depend on blending the lessons of the past with the weapons of the future. The debut novel by two leading experts on the cutting edge of

national security, it is unique in that every trend and technology featured in the novel is real, or could be soon Praise for Ghost Fleet‘A wild book, a real page-turner’ The Economist ‘Ghost Fleet is a thrilling trip through a terrifyingly plausible tomorrow. This is not just an excellent book, but an excellent book by those who know what they are talking about. Prepare to lose some sleep’ D. B. Weiss, writer of HBO’s Game of Thrones ‘It’s exciting, but it’s terrifying at the same time’ General Robert Neller, commandant of the U.S. Marine Corps

Ghost, Thunderbolt, and Wizard Robert W. Black 2008-03-20 Noted Ranger historian Robert W. Black turns his attention to a trio of the Confederacy's--and America's--most infamous raiders and cavalrymen: John Singleton Mosby, John Hunt Morgan, and Nathan Bedford Forrest. Combining speed, mobility, and boldness, these three soldiers struck critical blows against the Union during the Civil War, including Morgan's notorious 1863 raid that penetrated farther north than any other uniformed Confederate force. While not overlooking their flaws, Black believes these men revolutionized warfare and sees them as forerunners of the Rangers and Special Forces of the modern era.

*A History of the Laws of War: Volume 3* Alexander Gillespie 2011-10-07 This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day. Relying on written records from as far back as 2400 BCE, and using sources ranging from the Bible to Security Council Resolutions, the author pieces together the history of a subject which is almost as old as civilisation itself. The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them, protecting civilians who are either inadvertently or intentionally caught up between them, and controlling the use of particular classes of weapons that may be used in times of conflict. Thus it is that this work is divided into three substantial parts: Volume 1 on the laws affecting combatants and captives; Volume 2 on civilians; and Volume 3 on the law of arms control. This third volume deals with the question of the control of weaponry, from the Bronze Age to the Nuclear Age. In doing so, it divides into two parts: namely, conventional weapons and Weapons of Mass Destruction. The examination of the history of arms control of conventional weapons begins with the control of weaponry so that one side could achieve a military advantage over another. This pattern, which only began to change centuries after the advent of gunpowder, was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane. By the late twentieth century, the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons. The focus on indiscriminate weapons, when applied on a mass scale, is the core of the second part of the volume. Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century. Although both chemical and biological warfare have long historical lineages, it was only after the Second World War that technological developments meant that these weapons could be applied to cause large-scale damage to non-combatants. thi is unlike uclear weapons, which are a truly modern invention. Despite being the newest Weapon of Mass Destruction, they are also the weapon of which most international attention has been applied, although the frameworks by which they were contained in the last century, appear inadequate to address the needs of current times. As a work of reference this set of three books is unrivalled, and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare. It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself.

**6 Group Bomber Command** Chris Ward 2010-06-15 6 Group was born out of the British Commonwealth Air Training Plan (BCATP), which, among other things called for the formation of 25 Canadian Squadrons in Britain. This figure was later downsized. The Canadian vision was of a Canadian force operating independently alongside Bomber Command in the manner of the American 8th, but skillfull negotiating by the British resulted in Canadian Bomber squadrons operating within the RAF under RAF control but funded by Canada. On the 1st of January 1943 most of the existing RCAF squadrons were brought together on stations in North Yorkshire and County Durham to form 6 Group. By the end of the war 14 Squadrons were operational and one other had been posted to the Pathfinders. After an uncertain beginning the Group became an efficient and valuable contributor to Bomber Command's campaigns. Beginning predominantly with Wellingtons the Group was re-equipped with a mixture of Halifaxes and Lancasters, including the Hercules powered MkII and the Canadian built MKX.

The Guns of Tanith Dan Abnett 2015-11-01 The fifth novel in Abnett's series finds the troops taking part in an all-out attack on the cities of Phantine. But the helpless are being murdered and one of Gaunt's own men may be responsible. Original.

**The Praetorian STARShip : the untold story of the Combat Talon** 2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Straight Silver Dan Abnett 2016-06-28 Commissar Gaunt and his men undertake a seemingly suicidal mission in the blood-soaked trenches of the 41st Millennium. On the battlefields of Aexe Cardinal, the struggling forces of the Imperial Guard are locked in a deadly stalemate with the dark armies of Chaos. Commissar Ibram Gaunt and his regiment, the Tanith First and Only, are thrown headlong into this living hell of trench warfare, where death from lethal artillery is always just a moment away. The only chance for Gaunt and his lightly armed scouts to survive is to volunteer for a mission so dangerous that no one else dares accept it.
