

Digital Concepts The Cultural Context Of New Information Technologies

Cultural Heritage in a Changing World Karol Jan Borowiecki 2016-05-02 The central purpose of this collection of essays is to make a creative addition to the debates surrounding the cultural heritage domain. In the 21st century the world faces epochal changes which affect every part of society, including the arenas in which cultural heritage is made, held, collected, curated, exhibited, or simply exists. The book is about these changes; about the decentring of culture and cultural heritage away from institutional structures towards the individual; about the questions which the advent of digital technologies is demanding that we ask and answer in relation to how we understand, collect and make available Europe's cultural heritage. Cultural heritage has enormous potential in terms of its contribution to improving the quality of life for people, understanding the past, assisting territorial cohesion, driving economic growth, opening up employment opportunities and supporting wider developments such as improvements in education and in artistic careers. Given that spectrum of possible benefits to society, the range of studies that follow here are intended to be a resource and stimulus to help inform not just professionals in the sector but all those with an interest in cultural heritage.

Digital Capital Massimo Ragnedda 2020-01-29 This work represents the first attempt to position digital capital as cumulative and transferable, independent from, and intertwined with the other five forms of capitals. The book aims to propose a theoretical toolkit and empirical model that can be used by policy makers to tackle social inequalities created by the digital exclusion of citizens.

Defiant Publics Daniel Drache 2013-08-23 Social activism and dissent have become global phenomena for our times. Ordinary people across the world are fighting back. This newly potent political force has defeated governments in India and Spain, and has brought down the EU draft constitution. Disaffected by the triumph of markets, public goods, public interest and public spaces are regaining political ground.

Daniel Drache argues that, feeding off distrust and suspicion of governments, and assisted by the new cultural flows of people, ideas and information, this is a political phenomenon without historical precedent. No-one owns the new public, elites remain baffled by its power and impact. No-one can contain its innovative, inclusive and rapidly evolving organizational style. No-one can determine when the current cycle of dissent will peak. This lively and engaging book is a must-read for anyone interested in the role of protesters and publics in contemporary politics.

Supporting Multiculturalism and Gender Diversity in University Settings Zhou, Molly Y. 2015-03-31 Despite modern technology and the focus on international business striving to make the world a smaller place, many organizations still struggle with the need for diversity and multiculturalism. This issue is also present in academia, as women of color and those previously perceived to be in the ethnic minority continue the journey to become the educators and leaders that universities need. Supporting Multiculturalism and Gender Diversity in University Settings examines the experiences of some of these female leaders and what they learned in their rise through education and academia. Highlighting stories of feminism, race, and what it means to use these life lessons in the classroom, this book is a valuable resource for higher education administrators, policymakers, and women professionals everywhere.

Computer Communication Technologies for the 90's Josef Raviv 1988 The rapid development of computer communications has affected computer technology in general, as well as the functioning of corporations, government departments and the academic world. New issues have emerged, such as the use of computer communications to gain a competitive edge for an enterprise, the use of central databases and the remote installation of central computer equipment. The topics covered in this book include the dramatic development of optical communications, various ISDN applications, fast packet switching, network planning, monitoring, addressing, experience and architecture, OSI, routing and LAN, regulatory issues, and factory networks.

ECLAP 2012 Conference on InformationTechnologies for Performing Arts, Media Access

and Entertainment Paolo Nesi 2012 It has been a long history of Information Technology innovations within the Cultural Heritage areas. The Performing arts has also been enforced with a number of new innovations which unveil a range of synergies and possibilities. Most of the technologies and innovations produced for digital libraries, media entertainment and education can be exploited in the field of performing arts, with adaptation and repurposing. Performing arts offer many interesting challenges and opportunities for research and innovations and exploitation of cutting edge research results from interdisciplinary areas. For these reasons, the ECLAP 2012 can be regarded as a continuation of past conferences such as AXMEDIS and WEDELMUSIC (both pressed by IEEE and FUP). ECLAP is an European Commission project to create a social network and media access service for performing arts institutions in Europe, to create the e-library of performing arts, exploiting innovative solutions coming from the ICT.

Information Technology and Authentic

Learning Angela McFarlane 2003-10-04 As the presence of computers in the primary classroom increases and IT becomes a bigger part of learning, the book takes a realistic look at the role of the computer in the National Curriculum, and asks some important questions. The book is designed to help teachers incorporate IT into their day-to-day teaching, offering practical guidance and advice on task planning and management and includes examples of classroom practice. The book covers all curriculum areas, examining curriculum-specific issues as well as more general concerns such as pupil-expectation and self-esteem, problem solving, collaborative learning, data-handling, homework and the effects on the pupil-teacher dynamic. This book will be essential to all primary school teachers and trainees.

Transnational Culture in the Internet Age

Sean A. Pager 2012-01-01 Digital technology has transformed global culture, connecting and empowering users on a hitherto unknown scale. Existing paradigms from intellectual property rights to cultural diversity and telecommunications regulation seem increasingly obsolete, confounding policymakers and provoking wide-ranging debate.

Transnational Culture in the Internet Age draws on a range of disciplines to examine new approaches to regulating communications and cultural production. The insightful contributions shed new light on insufficiently examined issues and highlight connections that cut across the many different domains in which such regulations operate. Building upon the framework presented by David Post – one of the first and most prominent scholars of cyber law and a contributor to this volume – the authors address the implications and economics of the Internet's astronomical scale, jurisdiction and enforcement of the web as it relates to topics including libel tourism and threats to free speech, and the power of global communication to dissolve and recreate identities. Ideal for students and scholars of innovation, technology, cyber law and communication, Transnational Culture in the Internet Age will be a valuable addition to any library.

Proceedings of the 2nd International Conference on Internet, Education and Information Technology (IEIT 2022)

Ahmed El-Hashash 2023-02-10 This is an open access book. As a leading role in the global megatrend of scientific innovation, China has been creating a more and more open environment for scientific innovation, increasing the depth and breadth of academic cooperation, and building a community of innovation that benefits all. These endeavors have made new contribution to globalization and creating a community of shared future. To adapt to this changing world and China's fast development in this new area, the 2nd International Conference on Internet, Education and Information Technology (IEIT 2022) is to be held in April 15-17, 2022. This conference takes "bringing together global wisdom in scientific innovation to promote high-quality development" as the theme and focuses on research fields including information technology, education, big data, and Internet. This conference aims to expand channels of international academic exchange in science and technology, build a sharing platform of academic resources, promote scientific innovation on the global scale, improve academic cooperation between China and the outside world. It also aims to encourage exchange of information on research frontiers in different fields, connect the most advanced academic resources in China and abroad, turn

research results into industrial solutions, bring together talents, technologies and capital to boost development.aaaa

Advances in Usability, User Experience and Assistive Technology

Tareq Z. Ahram

2018-06-27 This book focuses on emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interaction with products, services and systems, and focuses on finding effective approaches for improving user experience. It also discusses key issues in designing and providing assistive devices and services to individuals with disabilities or impairment, to assist mobility, communication, positioning, environmental control and daily living. The book covers modelling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Virtual reality, digital environments, heuristic evaluation and forms of device interface feedback of (e.g. visual and haptic) are also among the topics covered. Based on the AHFE 2018 Conference on Usability & User Experience and the AHFE 2018 Conference on Human Factors and Assistive Technology, held on July 21-25, 2018, in Orlando, Florida, USA, this book reports on cutting-edge findings, research methods and user-centred evaluation approaches.

Handbook of Research on Perspectives on Society and Technology Addiction Sine Nazli, Rengim 2023-06-19 Internet-based technologies prevail in most of the world. Along with the positive features of digital technologies that permeate our lives in almost every area, including lifestyles and daily practices, the traces of negative aspects have also become evident. Digital addiction is among the most important of these aspects. It is obvious that communication, which has been maintained in various forms since the beginning of humanity, has been shaped by the period in which it is lived. The technology-based transformation has transformed communication, which has been adopted to the "internet" in the world, into a completely different form. Communication, which has become sustainable at any time and anywhere, regardless of location, led by the never-ending elements of "continuity" and "interaction," has turned into an indispensable form. Perspectives on Society and Technology Addiction examines every subject of digital addiction in an interdisciplinary way. It discusses the issues about what technology addiction is, how to deal with this addiction, how to use the existing technology in a positive way, how to deal with this technology for disadvantaged groups, and concerns in the fields of social science and communication science. Covering topics such as Consumer 5.0, experience design, and information markets, this premier reference source is an essential resource for sociologists, policymakers, students and educators of higher education, researchers, and academicians.

How People Learn II National Academies of

Sciences, Engineering, and Medicine 2018-10-27
 There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.
E-Governance and Social Inclusion: Concepts and Cases Baum, Scott 2014-05-31 The application of e-government technologies has led to increased public participation and social inclusion, while allowing for greater government transparency. These technologies provide accessibility to online content and services while offering the public an active voice in governmental issues. *E-Governance and Social Inclusion: Concepts and Cases* presents current and emerging research about the implementation of technology in government and its broad social implications. This handbook aims to be a comprehensive reference publication for academicians, researchers, practitioners,

students, and managers with an interest in e-government content and the ability for the public to access and utilize this technology. Human Rights, Digital Society and the Law Mart Susi 2019-05-31 The Internet has created a formidable challenge for human rights law and practice worldwide. International scholarly and policy-oriented communities have so far established a consensus regarding only one main aspect – human rights in the internet are the same as offline. There are emerging and ongoing debates regarding not only the standards and methods to be used for achieving the "sameness" of rights online, but also whether "classical" human rights as we know them are contested by the online environment. The internet itself, in view of its cross-border nature and its ability to affect various areas of law, requires adopting an internationally oriented approach and a perspective strongly focused on social sciences. In particular, the rise of the internet, enhanced also by the influence of new technologies such as algorithms and intelligent artificial systems, has influenced individuals' civil, political and social rights not only in the digital world, but also in the atomic realm. As the coming of the internet calls into question well-established legal categories, a broader perspective than the domestic one is necessary to investigate this phenomenon. This book explores the main fundamental issues and practical dimensions related to the safeguarding of human rights in the internet, which are at the focus of current academic debates. It provides a comprehensive analysis with a forward-looking perspective of bringing order into the somewhat chaotic online dimension of human rights. It addresses the matter of private digital censorship, the apparent inefficiency of existing judicial systems to react to human rights violations online, the uncertainty of liability for online human rights violations, whether the concern with personal data protection overshadows multiple other human rights issues online and will be of value to those interested in human rights law and legal regulation of the internet.

Post-Digital, Post-Internet Art and Education

Kevin Tavin 2021-06-28 This open access edited volume provides theoretical, practical, and historical perspectives on art and education in a post-digital, post-internet era. Recently, these

terms have been attached to artworks, artists, exhibitions, and educational practices that deal with the relationships between online and offline, digital and physical, and material and immaterial. By taking the current socio-technological conditions of the post-digital and the post-internet seriously, contributors challenge fixed narratives and field-specific ownership of these terms, as well as explore their potential and possible shortcomings when discussing art and education. Chapters also recognize historical forebears of digital art and education while critically assessing art, media, and other realms of engagement. This book encourages readers to explore what kind of educational futures might a post-digital, post-internet era engender.

Cultures and Globalization Helmut K Anheier

2008-09-17 The world's cultures and their forms of creation, presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The Cultures and Globalization series is designed to fill this void in our knowledge. In this series, leading experts and emerging scholars track cultural trends connected to globalization throughout the world, resulting in a powerful analytic tool-kit that encompasses the transnational flows and scapes of contemporary cultures. Each volume presents data on cultural phenomena through colourful, innovative information graphics to give a quantitative portrait of the cultural dimensions and contours of globalization. This second volume The Cultural Economy analyses the dynamic relationship in which culture is part of the process of economic change that in turn changes the conditions of culture. It brings together perspectives from different disciplines to examine such critical issues as: • the production of cultural goods and services and the patterns of economic globalization • the relationship between the commodification of the cultural economy and the aesthetic realm • current and emerging organizational forms for the investment, production, distribution and consumption of cultural goods and services • the complex relations between creators, producers, distributors and consumers of culture • the policy implications of a globalizing cultural economy By demonstrating empirically how the

cultural industries interact with globalization, this volume will provide students of contemporary culture with a unique, indispensable reference tool.

Globalisation, Freedom and the Media after Communism Birgit Beumers 2013-10-18 This book examines the fate of post-Soviet press freedom and media culture in the context of the growing impact of globalisation. To understand the complicated situation that has arisen with respect to these issues in post-Soviet space is impossible without collaboration between political scientists, sociologists, cultural analysts, media studies researchers and media practitioners. The book is one of the first attempts to bridge the gaps between political and cultural studies approaches, between textual analysis and audience research, as well as between practitioner-led and scholarly approaches to the post-Soviet media. The cumulative impact of the essays contained in this section is to reinforce the intuition which inspired it: that the post-Soviet media remain a highly heterogeneous, complex and dynamic field for investigation. With contributions from scholars and journalists across Europe (including the former Soviet Union), the collection addresses such issues as censorship and elections, the legacy of the Soviet past, terrorism and the media, the post-Soviet business press, advertising and nation building, official press discourse and entrepreneurship, and global formats on Russian television. This book was originally published as a special issue of *Europe-Asia Studies*.
